

K2 DFA-39

WINTER DIESEL FUEL ANTI GEL

Professional product to refine fuel oil. Prevents the precipitation of parafin crystals and blocking the fuel filter. Keeps the injectors clean, lubricates the fuel pump, prevents corrosion from forming inside the fuel system. Increases the cetane number of diesel fuel for better cold start.

Directions: Shake well before use. Use preventively before before refueling in a ratio of 500 ml DFA-39 per 600 litres of fuel. In case of use summer fuel oil in winter it is recommended to increase the dose of the product in a ratio 500 ml per 300 litres of fuel. Overdose is not harmful.
